GOING GREEN

COTA recognizes the importance of a healthy environment. Sustainable actions taken today will protect the environment for generations to come.

BIKE’N BUS

COTA’s Bike ’n Bus front-mounted bike racks, available on all COTA buses, securely hold two bikes per rack and are available to all COTA passengers on a first-come, first-serve basis at no additional cost! For step-by-step instructions please visit cota.com.

GREEN FLEET

In May of 2013, COTA rolled out 30 compressed natural gas buses as the newest part of COTA’s Green Fleet. These new buses are more environmentally friendly than their diesel powered counterparts and are more efficient, burn cleaner, reduce fuel costs and are quieter inside and out. COTA also has six hybrid buses which have been in operation since 2010.

COTA TAKES THE LEED

Our operating facilities also have sustainable features. Many of our buildings are Leadership in Energy and Environmental Design (LEED) certified and we are currently pursuing Gold and Silver certification for several of our construction projects. Please visit cota.com for more details.

TAKING THE RECYCLING ROUTE

COTA encourages recycling and waste reduction on all levels. COTA recycles paper, plastic, glass, aluminum, fluorescent lights, ink cartridges, steel scraps, oil, antifreeze and transmission fluids, yard waste, computers and more!
